Cult Edition

È il racconto della graduale presa di coscienza della classicità come elemento fondamentale della quotidianità.

È un intreccio di richiami classici e rassicuranti con uno spirito nuovo, giovane e glamour. Ne risulta una saliente sfilata di luce dalla personalità tutta sua, affatto comune, che, nello scorrere delle pagine, non cede agli effimeri eccessi delle mode.

Il concetto associato a questa edizione nasce dalla percezione del contesto nel quale viviamo e dalla consapevolezza che essere proiettati verso il futuro non significa lasciarsi alle spalle un passato.

La collezione classica non deve essere considerata come un passaggio di storia relegato alla memoria, ma viene rimessa in gioco per rimanere “a portata di mano”.

L'elemento di base sotteso è il nostro Made in Italy, inteso come autentica ricerca e valorizzazione del ricco patrimonio artigianale italiano.

Roberta Vitadello, direttore creativo, è alla guida di un team affiatato, aperto verso nuovi orizzonti. Capace di una visione in continua evoluzione, trova fonti di ispirazione divertenti e creative per progetti che piacciono e coinvolgono, scoprendo che i confini tra luce, moda e arte si fanno sempre più sfumati.

Alla base di tutto, la capacità di osservare le cose del passato con occhio nuovo.

Design&restyling: R. Vitadello e S. Traverso in collaborazione con M. Graffeo.

Cult Edition

It is the story of the gradual realization that classicism is as a substantial element of everyday life.

It is a mix of classical and reassuring references with a new spirit, young and glamorous. The outcome is a striking parade of light with bright personality, quite uncommon, which in the streaming of the pages never gives way to the ephemeral excesses of fashion.

The concept associated with this edition stems from the perception of the context in which we live and from the awareness that being projected into the future does not mean leaving the past behind.

The classic collection should not be considered as a passage of history relegated to memory, rather it should be put back to play to stay "at hand".

The basic element underlying the collection is our Made in Italy, seen as a genuine research, enhancement and development of the rich heritage of Italian craftsmanship.

Roberta Vitadello, creative director, leads a strong and harmonious team, always open to new horizons. Capable of an evolving vision, the creative team draws amusing and creative inspirations for appealing and involving projects, discovering that the boundaries between light, fashion and art blur more and more.

Behind it all, the ability to observe things from the past with new eyes.

Design&restyling: R. Vitadello e S. Traverso in collaboration with M. Graffeo.

Swarovski Crystal Palace - Milan 2003 - "Cascade"- design: Vincent Van Duysen - this lighting object has been produced by Italamp for Swarovski Crystal Palace

Cristallo

La realizzazione del cristallo risale al 1700 circa e da allora è ricercato per la sua straordinaria bellezza, sinonimo di ricchezza e nobiltà di una materia viva e lucente che sprigiona un fascino antico.

Il cristallo infatti è un vetro che possiede particolari peculiarità di lucentezza, trasparenza, elasticità e sonorità. La differenza sostanziale con il vetro è data dalla ricchezza di sostanze chimiche nella miscela di cui è formato e che la temperatura di fusione è molto più alta.

Il cristallo ha una maggiore rifrazione e risulta perciò più lucente, ed è più sonoro del vetro.

Crystal

The production of crystal dates back to seventeenth century and since then crystal has been sought after for its extraordinary beauty, synonymous with wealth and nobility of a living material which brightness emanates an antique charm.

Indeed crystal has particular quality of brightness, transparency, elasticity and sound. The main difference with the glass is given by the richness of the chemical formula it is made of, and that the temperature is much higher.

The crystal has a higher refractive index and is therefore brighter than glass.

Finish: etched, nickel - Bulbs: 3x28w - E14*

Vetro

Si ottiene per fusione in un forno ad alte temperature di una miscela omogenea di minerali, detti materie prime, e rottame di vetro, in opportune proporzioni di peso.

Fino alla fine del XVIII sec. le ceneri vegetali, la silice e pochi altri composti erano praticamente gli unici componenti della miscela.

Oggi la chimica moderna ha fatto rapidi progressi ed i suoi prodotti hanno raggiunto alla fine del XIX secolo un alto grado di perfezione, dando possibilità ai maestri artigiani di realizzare oggetti unici.

Glass

It is obtained by fusion in a furnace at high temperature of a homogeneous mixture of minerals, called primary materials, which are mixed in appropriate proportions, and glass scraps.

Until the late eighteenth century, natural ashes, silica and a few other compounds were basically the only components of the mixture.

Today, since the development of modern chemistry, even the glass process has made rapid progress and its products have reached at the end of the nineteenth century a high level of perfection. Hence the opportunity for master artisans to create unique objects.

Incalmo del Cristallo

È una tecnica che permette di ottenere soffiati caratterizzati da due o più zone cromatiche diverse.

Soffiatura del Cristallo

La tecnica che rivoluzionò la produzione del vetro e del cristallo. Famosa nel mondo, la soffiatura avviene con canna metallica con cui il vetraio attinge dal crogiolo la quantità necessaria di materia incandescente. Soffia poi dall'altra estremità e, con l'aiuto di appositi utensili, dà forma a oggetti di pregio.

Incamicatura del Cristallo

Questa tecnica consiste nella modellazione di un soffiato in vetro o cristallo che viene successivamente ricoperto con un altro strato di colore diverso. Si ottiene così una superficie sottile e uniforme che, una volta intagliata, lascia trasparire lo strato sottostante creando eleganti effetti cromatici.

Incalmo

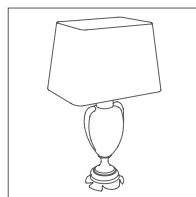

This is a technique that allows to obtain blown object characterized by two or more areas of different colours.

Blowing

The technique that made the revolution in the glass and crystal production. Famous in the world, the glass blowing is made with a metal rod with which the artisan draws the required amount of incandescent glass from the crucible; then the glassworker blows carefully from the other end and shapes the objects with the help of specific tools.

Overlay

This technique consists in shaping a blown glass or crystal object and covering it with a layer of glass or crystal of a different colour. The result is a uniform surface that, once carved, reveals the layer underneath giving elegant chromatic effects.

Ogni prodotto Italamp è corredato di una documentazione contenente tra l'altro il certificato di autenticità e la scheda di collaudo. In caso di reclamo il cliente dovrà sempre fornire copia della scheda. Sulla scheda sono contenute anche le istruzioni per un corretto montaggio dell'articolo.

Italamp non risponde per eventuali danni a persone o cose causati da una non corretta installazione dei propri apparecchi di illuminazione, da un uso di lampadine non conformi e dalla modificazione delle caratteristiche tecnico costruttive.

La ditta si riserva di apportare ai modelli ogni modifica estetica e tecnica che a suo insindacabile giudizio ritenga necessaria.

Il marchio **CE** è un marchio europeo di garanzia che certifica la qualità del prodotto e la sua rispondenza ai parametri di sicurezza previsti dalle normative CEE.

Italamp può fornire per la quasi totalità dei suoi articoli la certificazione con marchio UL. In tutto il mondo UL testa prodotti secondo i requisiti di sicurezza statunitensi per un accesso sicuro ovunque nel Nord America.

UNI EN ISO 9001/2008 certifica in maniera stabile l'alta qualità e la grande affidabilità di tutti i processi produttivi aziendali della produzione Italamp.

Italamp è un marchio registrato. Tutti i nostri modelli sono depositati e quindi coperti da brevetto.

Questo catalogo è tutelato dalla legge sui diritti d'autore (legge 22/4/1941 n°633 e dalla legge 14/12/1942 n°1485).

È vietata ogni riproduzione anche parziale dello stesso.

Each item is equipped with its own documentation including a certificate of authenticity and a card with instructions for quality control inspections. In case of complaint the customer should send us a copy of this card, which also contains instructions for correct assembling of the fixture.

Italamp is not liable for incidental injuries or damage to people or things due to: incorrect installation of the fixtures, use of not suitable bulbs, modification of the original technical features of the items.

The company has the right to modify any model for both aesthetic and technical features when necessary, according to Italamp's unquestionable judgement.

*The **CE** label is a European guaranteed mark. It certifies product quality and its compliance with the safety standards stated by EEC regulations.*

Italamp can provide for most of its products the UL certification. Worldwide, UL tests products according to U.S. safety requirements for secure access anywhere in north U.S.

UNI EN ISO 9001/2008 steadily certifies the high quality and the great reliability of all Italamp production processes.

Italamp is a registered trademark. All our items are registered and covered by patent.

This catalogue is copyrighted and protected by the italian law (22/4/1941 n°633 and 14/12/1942 n°1485).

Any reproduction of this catalogue is strictly forbidden.

Swarovski Crystal Palace - Paris 2003 - "Ball" - design: Tom Dixon - this lighting object has been produced by Italamp for Swarovski Crystal Palace
