The main attraction.

Geberit Monolith

For people with character.
And those who enjoy good things.

So you want to add a strong, fresh touch to your new bathroom. With Geberit Monolith sanitary modules, you don't have to compromise. Because a truly good design makes a strong impression not only with its shape but also with its function, its materials and the technology behind it all.

More flexibility.
In many versions.

The Geberit Monolith sanitary modules offer undreamed-of possibilities when it comes to designing your bathroom. For example, you can combine the modules with the majority of the commercially available taps and ceramic appliances. Moreover, you can choose between different colours for the front covers made of high-quality safety glass. Last but not least, the installation typically does not require any structural modifications to the building. This is a great advantage in new construction as well as in renovations. In short: The sanitary modules have been thought out down to the last detail and have a lot more to offer than one might expect at first glance.

The Geberit Monolith sanitary module for wash-basins unites a high degree of functionality with a clear, strong design language. The unit is made of high-quality, low-maintenance materials such as glass and aluminium and contains Geberit's proven sanitary technology as well as flexible interfaces that make for quick and secure installation with existing connections. And of course, the Monolith can be combined with a great variety of taps and washbasins from many different manufacturers.

Geberit Monolith for washbasins.
Functional design with style.

1 Drawer
You can opt to integrate drawers into the Geberit Monolith sanitary module for washbasins – giving you extra storage space for bath products just where you need them, in an attractive unit that fits right into the décor.

Shining star.
Geberit Monolith Plus.

The Geberit Monolith Plus sanitary module for WCs is a genuine all-rounder. Its integrated odour extraction function, intelligent sensor technology and exceptionally convenient flush actuation are just three of the many fantastic features it offers.

Choose the ambience you want

ComfortLight is the most striking feature of the Geberit Monolith Plus sanitary module for WCs. Select any one of seven colours and watch it create an exceptionally pleasant ambience in your bathroom.

| magenta | warm white | white | turquoise | blue | orange | yellow |

Gentle
Soft-touch flush actuation

Flexible
Brightness sensor for day/night detection

Pleasant ambience
ComfortLight in a range of colours

Efficient
Ceramic honeycomb filter for air cleaning

Intelligent
Switches on and off with sensor control

Quiet
Fan for odour extraction

Geberit Monolith for bidets.
Uncompromising design.

The Geberit Monolith sanitary module for bidets brings the series full circle. Installation is as easy as with the Monolith for WCs. A great variety of bidet ceramics can be installed on the module, which includes a matching towel rail.
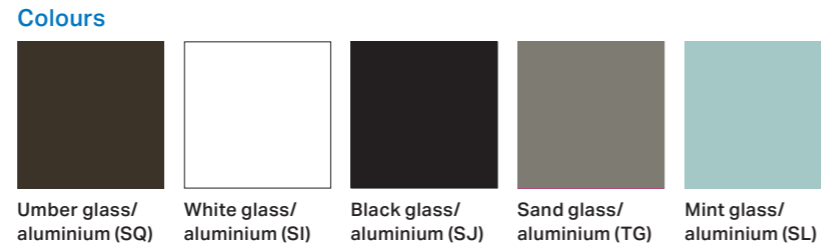

Less work.
More bathroom.

New bathroom

Old bathroom

Geberit Monolith sanitary modules also give you a lot of freedom of choice when renovating a bathroom. Installation of a Monolith module creates hardly any mess because the walls do not need to be opened up and the existing water and drainage connections can be used. Work is kept to a minimum. Give your bathroom a new look with a timeless and beautiful design.
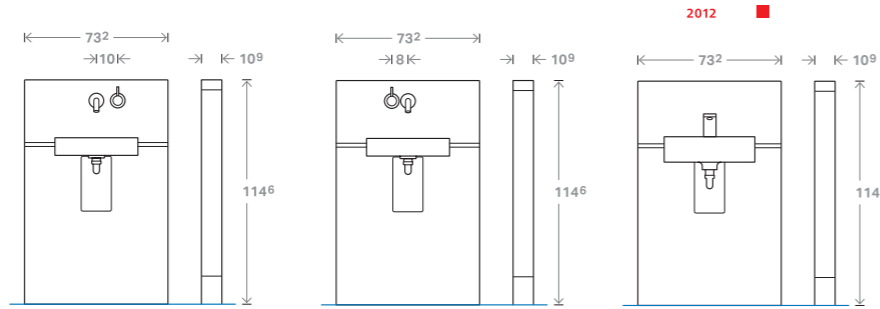

Simple planning and installation.
