Why RAVAK

BECAUSE YOU CAN TRUST OUR PRODUCTS

Established in 1991, RAVAK is still fully in the hands of the founding Czech owners. Starting with the production of shower enclosures and shower trays, the company has become the leader in the manufacture of bathroom products across Central and East Europe. Our success is based on adhering to the basic rules, such as supervision of uncompromising quality and original author's design, but what makes us truly different from the competitors is the fact that our products are in all respects customer oriented - they are comfortable, practical, reliable and beautiful at the same time.

We are trend creators, developing unique technical solutions, proprietary technologies and materials. Our aim is to offer complex equipment through our bathroom concepts in which the bath or shower are matched with a corresponding basin, furniture and a wide range of accessories in the same design.

Millions of satisfied customers across the world.

CLIENTS FROM ALL AROUND THE WORLD ENJOY THE BENEFITS OF RAVAK BATHROOM SOLUTIONS

Seventy percent of our total production is exported and we spread the good image of the European products to more than fifty countries around the world. You can find our bathroom equipment in the most famous hotels (Hotel President - Ukraine, Hotel Royal Azur - Tunisia, Hotel Orange - Spain, Pheonicia Grand Hotel - Romania, Marriott Hotel - Poland, Hotel Opera - Ukraine and many others).

The RAVAK products can also be found in many public spaces, recreational facilities, businesses, and mainly in homes.

STORZ *Design*

A DESIGNER IS NOT ONLY AN ARTIST OR NAIVE DREAMER

A good designer stands out for the great technical and engineering skills, be aware of practical context and provide the designed product with original form and technical imprint. Therefore, Ravak has chosen distinguished design studios, with creative ideas and well known stand in the most competitive environment, for example automotive industry.

The same designers who create bodies and interiors of top brand cars work also for RAVAK.

Achim Storz

- › top designer in the automotive and sports industries
- › designer for Lotus and McLaren
- › founder of the DESIGN STORZ studio
- › creator of the Whitewater shower enclosure, and Rosa II, Avocado, LoveStory II, You, Magnolia and XXL baths

— STORZ

Study for the 3rd millennium

LoveStory II Bath

Design of the Colgate toothbrush

Design NOSAL

A SENSE OF HARMONY AND AESTHETIC THINKING ARE THE BASIS OF A GOOD DESIGN

However, the ability to give shape to beauty alone is not sufficient. As our technical world becomes increasingly complicated, each one of us needs to make some effort to find our way in it. Therefore we long not only for products of interesting design, but mainly for products that are practical, perfectly engineered, simple and safe.

Kryštof Nosál

- › in 2013 nominated for the Czech Grand Design prize as a Designer of the Year for the BathGallery bath set
- › co-author of the OVO P shower seat and author of the Ovo B seat and Ovo B Decor
- › the author of basins made of cast materials and ceramics, bathroom concepts of 10°, Chrome, Evolution, BeHappy, Classic, Rosa 95, and the ranges of Pivot, SmartLine and Brilliant shower enclosures and shower doors
- › Co-author of the Washman - Electrolux washing machine designed specifically for men

Screwdrivers for Narex

The Evolution bath was awarded in 2006 the Product of Excellence prize by the Design Centre Czech

Chrome Concept - equipment for the entire bathroom

RAVAK Technology

RAVAK Press Shop

Making an acrylic moulding of a future bath by using the advanced technology of vertical heating.

THE LATEST TECHNOLOGIES GIVE THE TOP QUALITY

Not only quality materials, but also the technology used, affects the final result. This is why in 2008 we opened a unique electroplating plant as the only manufacturer of shower enclosures in Central and East Europe. Having our own electroplating plant and paint shop, we can guarantee top quality finishing of our shower enclosures, doors and bath screens as their quality is constantly monitored.

On the same principle, in the bath manufacture we use a new technology of vertical spot heating of acrylic plates, resulting in a perfect extraction of the plate into the mould. To reinforce the bathtub by the PU Plus technology, we worked with Kawasaki to develop double coating technology using hard polyurethane foam, which makes these tubs sturdy, giving them unique thermal insulation properties.

RAVAK Electroplating Plant

Anodising aluminium profiles - manufacture of the sturdiest shower enclosure, door and bath screen frames.

RAVAK Paint Shop

Electrostatic powder painting of aluminium frames of shower enclosures, doors and bath screens.

RAVAK AntiCalc®

A revolutionary technology which creates an invisible protective layer over the surface of the glass, repelling water.

RAVAK Materials

Cast Marble

It is a mixture of ground dolomite and resin used to produce washbasins and shower trays

IN THE AREA OF NEW MATERIAL DEVELOPMENT, WE WORK WITH TOP RESEARCH LABORATORIES IN EUROPE AND THE USA

We all know it, two things that look the same, have different durability. We pay great attention to material selection. For example, the quality of a bath depends on what type of acrylate it is made of. This is why we use the highest quality cast acrylic (PMMA) which retains its shape for a long time and there is no danger of cracks or distortion. The same attention is paid to the reinforcement of the baths; to achieve the highest quality in both ways of bath reinforcement we had to develop our own mixtures and technologies. The development of the PU Plus material was conducted in collaboration with the well-known German company Bayer. And even in apparant ordinary things, such as material for the manufacture of bathroom furniture, we leave nothing to chance and pay close attention to its selection and testing of moisture resistance.

Fibreglass

Highly effective reinforcement of acrylic products with polyester resin with glass fibre.

PU PLUS

Exclusive technology of reinforcing acrylic baths with polyurethane foam. RAVAK's patent.

Chipboard

Bathroom furniture is manufactured from quality chipboard treated by high-quality moisture impregnation from leading European manufacturers.

RAVAK New Products 2015

Bathroom concept 10° which is coming towards you.

The concept is based on a slight rotation or slant of the components at an angle of 10°. The bath, washbasins and water taps give the impression as if they were coming to meet you, adding more comfort and utility.

WE LISTEN TO OUR CUSTOMER NEEDS AND FOLLOW GLOBAL TRENDS AS WELL

Clever solution of the space is the alpha and omega of any bathroom. When this requirement is taken up by a creative product designer and the team of skilled craftsmen in RAVAK's manufacturing department, it results in unique collections such as our new concept 10°.

In everyday use you will appreciate its usability and fresh design which you will never find boring.

We bring a new range of the Matrix shower enclosures for shower fans, and to make the bathroom perfect we offer a new rectangular free-standing bath Freedom R or a set of anti-slip strips/squares for safe movement in the bathroom.

Matrix shower enclosures

Original shower enclosures with elegant construction and no lower guiding profile

Freedom R bath

A free-standing bath with a water tap which will give you absolute freedom.

Safe bathroom

The SafeStep anti-slip strips or squares for safe movement in the bathroom.

Ask the Frog *how to design your bathroom*

Development of functional and well planned bathrooms belongs to our everyday activities. We will be happy to assist you.

Before you start designing a bathroom ask yourself a few essential questions that will help you decide:

- 1 How many people are going to use the bathroom?**
You need to consider the available space, sufficient shelf and storage space and choice of furniture.
- 2 Do you want a bath, shower enclosure, or both?**
If you cannot fit both a bath and a shower into your bathroom, use the elegant combination of a bath with a screen.
- 3 Do you want a toilet included in your bathroom, or do you prefer two separate rooms?**
If there are more than two people sharing the household, separating the bathroom and wc will be a smart solution .
- 4 You don't have as much space available as you need?**
Enlarge the bathroom by taking a part of a neighbouring room.

A solution for both smaller and mid bathrooms with a shelf space on the bath, a bath screen and a high column cabinet - the Rosa Concept.

Both a bath and a shower enclosure in the bathroom.

A toilet divided by a partition from the rest of the bathroom.

Clever and space-saving solution for bathrooms - the Avocado Concept

How to Choose a Shower Enclosure?

What needs to be considered:

Shape

oval

square or rectangular

Construction

framed

frameless

Size

90x90 cm or 80x100 cm?

Sealing quality

framed corners

frameless corners

You should consider not only the look of your shower enclosure, but also what type of construction and size will suit you best, what type of opening you prefer for your bathroom, etc.

Type of opening (sliding, folding, turning / with pivot, or turning / hinged)

Sliding
doesn't take up space and water runs back into the tray.

Folding and sliding
- large entrance which prevents water from running out of the shower enclosure.

Turning / with pivot
- a simple system of maintenance-free door opening.

Turning / hinged
equipped with a rising mechanism that enables the door to lift and lock in the main position.

For more details on the Ask the Frog help, please visit www.ravak.com:

Discover the Possibilities of Shower Doors

Choose the right combination of shower door for your bathroom.

Do not let standard shower enclosure dimensions limit your decision and discover shower door options. You can save up to half of the shower enclosure price, while creating a larger space for showering. Consider the dimensions. You may prefer showering space 80 x 100 cm instead of 90 x 90 cm. It takes up the same area, but the utility is increased.

Possible solutions:

- 1 Shower door with a fixed wall
- 2 Shower door with a brick partition
- 3 Dividing the room with a shower door or enclosing a niche

3

Dividing the room

Utilising a niche

For more details on the Ask the Frog help, please visit www.ravak.com:

Concepts RAVAK

Design co-ordinated unit

The RAVAK bathroom concepts provide you with confidence when furnishing a bathroom. Clear idea, unified design, precise workmanship, these are the main benefits of the RAVAK concepts.

Each of the concepts is based on the design of the bath which can also be evident in the shower, basins, bathroom furniture, bath screen, water taps and practical accessories.

RAVAK concepts are suitable for bathrooms of all sizes, from the smallest to the premium ones.

How to install a door with fixing and extension profiles to be found at www.ravak.com:

Tailor-made Solutions

Shower enclosure
into atypical space?
We have a solution!

*Do you have a an atypical bathroom?
You can't fit a shower enclosure
of standard dimensions in it?
We will customise it to your needs.*

*Try out the new configurator
of the RAVAK custom-built solutions.*

Our online configurator will help you create a product tailored to your bathroom (shower enclosure, shower door, fixed wall and bath screen/door). It lets you design your own product step by step, according to shape, size, type, frame/hinge colour, and panel. You can then comfortably send the defined product including the price calculation as an order and our staff will contact you promptly.

Configurator for your tailor-made solution will help you solve a non-standard height or width of the product. For further information go to www.ravak.com. However, if you need to solve angled ceilings, openings, non-standard vaults, easy-access entrances and such, feel free to contact us at atypy@ravak.cz, or call +420 318 427 288

Non-standard shower door in an attic bathroom (slanted wall).

Widened shower door without a bottom frame (easy-access entry).

Note: When combining a door with a fixed wall, the min./max. width applies for the shower door and min./max. depth for the fixed wall!

Brilliant
Honed perfection

Brilliant

New ergonomic handle - pure metal and solid design highlight the stately impression of the entire shower enclosure.

Sleek metal fittings - square, flat shape of metal elements distinguishes the Brilliant shower enclosure from all other enclosures on the market. Hinges are recessed into glass inside the shower enclosure, which simplifies maintenance in a revolutionary way.

Enables to **lift the door** and lock it in the main position

Glass is protected using the RAVAK AntiCalc® surface treatment technology

High-quality chromium-plated fittings have a minimum lifespan of 30 years.

Quadrant Shower Enclosures

BSKK3 - three-part quadrant shower enclosure

A luxurious product which will be a centrepiece of every bathroom.

Recommended shower trays: Elipso, Elipso Pro, Elipso Pro Flat, Elipso Pro Chrome or a shower channel or drain

Finish

CHROME

Complement your new shower enclosure by the RAVAK thermostatic tap which will keep constant temperature of water.

Brilliant

Surround yourself with luxury

Walk-In

*Life doesn't have to be a compromise.
Customised shower enclosures.*

Walk-In

Metal bracket - The Walk-In shower solution includes one or two imperceptible metal brackets which safely hold the large glass panels in place providing stability to the entire enclosure.

Safe and nice looking- shower enclosures are made of safety glass with a thickness of 8 mm. Therefore they exhibit high strength. During the production, they are fitted with the AntiCalc protective layer preventing scale depositing on the glass which therefore does not require intensive daily maintenance.

Customised shower enclosures

Walk-In Wall - one fixed wall - with one side entrance

Nice-looking solution which will adapt to your requirements

We recommend: Install the product directly onto the floor with a built-in shower channel or drain.

A design bracket is included with each Walk-In Free model.

Best selling dimensions - see the table

Product (type)	Entrance (mm)

Chrome

With a Sense for Details

The harmonious oval shape blends into all elements, such as the handle, the rotary side post of the door, and the fixed wall bracket, combining them into a perfect aesthetic whole. The handle turned upwards is easy to operate and it can also be used as a towel hook.

Maximum stability of the product is ensured by the fixed wall bracket with variable adjustment. It is unique in its jointed design.

Design co-ordinated unit

Enables to **lift the door** and lock it in the main position

Glass is protected using the RAVAK AntiCalc® surface treatment technology

Quadrant Shower Enclosure

Shower Doors

CSKK4 - four-part quadrant shower enclosure

This frameless shower enclosure features practical rotary posts, which replace door hinges. Both doors can be opened and therefore offer exceptionally wide entry.

CSD1 - single shower door

The door opens both in and out, which makes airing of the enclosure after showering much easier. Water can drip inside the shower enclosure. The door cannot be combined with a fixed wall.

Recommended shower trays: Elipso, Elipso Pro, Elipso Pro Flat, Elipso Pro Chrome or a shower channel or drain

Recommended shower trays: Angela, Perseus, Perseus Pro, Perseus Pro Flat, Perseus Pro Chrome, Gigant Pro, Gigant Pro Flat, Gigant Pro Chrome or a shower channel or drain

A bottom drip-ledge and a 10 mm high threshold strip ensure perfect sealing.

No more water dripping onto the floor thanks to the handy two-way door.

Chrome

This product is a combination of the CRV2 and CPS models.

CRV2 + CPS - shower door + fixed wall - front entry

You can also combine the shower door CRV1 or CRV2 with the fixed wall, next to which you can easily place a washbasin or washing machine.

Recommended shower trays: Angela, Perseus, Perseus Pro, Perseus Pro Flat, Perseus Pro Chrome, Gigant Pro, Gigant Pro Flat, Gigant Pro Chrome or a shower channel or drain

Finish: GLOSS SATIN WHITE

A rectangular shower enclosure will allow for the most comfortable showering. Consider whether you would prefer the size 80 x 100 cm to 90 x 90. It takes up the same area, but the utility is increased.

Rapier

A reliable enclosure with a charming design.

Rapier

Robust profiles – the contrast between a plain elegance of clear glass panels and a solid frame structure adds a unique appeal to the Rapier shower enclosure.

Space saving sliding system – the door doesn't open into the bathroom, therefore saving space. Nickel-cadmium surface finish provides the sliders' long service life.

Allows you to reach and clean difficult areas very easily

Silent run of your shower enclosure

Glass is protected using the RAVAK AntiCalc® surface treatment technology

Quadrant Shower Enclosure

NRKCP4 - four-part quadrant sliding shower enclosure

Features a distinctive style and design. Robust guiding profiles create an extraordinary solution out of this shower enclosure. The door tilt mechanism significantly simplifies maintenance of the whole showering space.

Recommended shower trays: Ronda, Elipso, Elipso Pro, Elipso Pro Flat, Elipso Pro Chrome or a shower channel or drain

Frame finish

The Jet Inox hydro massage panel will intensify your showering experience.

NOW ALSO IN A
GLOSSY COLOUR

Pivot

Clean Lines and Modern Design

Pivot door-opening mechanism - a high-quality stainless steel hinge which rotates around its axis when the door opens. This is a simple unbreakable door-opening system, which requires absolutely no maintenance.

Ergonomic handle with three functions - turned downwards or sideways, the handle enables you to open the door comfortably. Turned upwards, it becomes a very practical towel-hanger.

Right / left hand option
Turn the product by 180 degrees.

Minimum profiles and no unreachable spots

Glass is protected using the RAVAK AntiCalc® surface treatment technology

Quadrant Shower Enclosure

PSKK3 - three-part quadrant pivot shower enclosure

Maximum design at minimum price. Impressive and keenly priced shower enclosure featuring elegant clear glass panels and subtle metal profiles.

Recommended shower trays: Ronda, Elipso, Elipso Pro, Elipso Pro Flat, Elipso Pro Chrome or a shower channel or drain

Frame finish
 GLOSS SATIN WHITE

A shower enclosure with white frame comes in two designs: white or chromium-plated hinges and handles. A shower enclosure with satin frame features hinges and handles in satin finish.

NOW WITH THE
GRAPHITE PANELS

Blix

Stylish and Technically Perfect

Balanced design - the appearance of the shower enclosure is not disturbed by any inner vertical profiles. It features solely glass screens and a subtle frame. Plain and practical handles enhance the balanced look.

Easy maintenance - the door wing tilt mechanism will allow you to reach and clean difficult areas very easily.

Frame assembly requires only a few screws.

Silent run of your shower enclosure

Glass is protected using the RAVAK AntiCalc® surface treatment technology

Quadrant Shower Enclosures

BLCP4 - four-part quadrant sliding shower enclosure

Space-saving and budget-wise. The shower enclosure features a glass panel with a reliable slider.

Recommended shower trays: Ronda, Elipso, Elipso Pro, Elipso Pro Flat, Elipso Pro Chrome or a shower channel or drain

Complement your new shower enclosure by the RAVAK thermostatic tap.

■ PSS - 80	770 - 805	✓	—	✓	—	✓	—
■ PSS - 90	870 - 905	✓	—	✓	—	✓	—

- Height of the product is 1880 mm.
- Height of the product is 1850 mm.

The products are as standard delivered within 14 days.

Usage possibilities:

Combine the APSS or PSS fixed wall and the chosen shower door to obtain a shower enclosure tailored to your bathroom. You can choose from these combinations:

For the total cost: add the prices of the fixed wall and the shower door, according to the selected size and type.

The SDZ2, SDZ3 and SDOP shower doors can be combined with the PSS fixed walls only.
The ASDP3 shower doors are compatible with the APSS fixed walls only.

If you use the shower door with fixed wall, you can easily place a washing machine next to the shower enclosure.

Shower Doors

ASDP3 - three-part sliding shower door

Extremely durable, practically unbreakable shower door. Ideal solution also for busy public areas (hotel, hostels, hospitals and such).

SDZ2 - two-part folding shower door

Suited to the smallest rooms in dimensions of 67 - 71 cm. The folding door enables the maximum entrance width.

Recommended shower trays: Aneta, Angela, Perseus, Perseus Pro, Perseus Pro Flat, Perseus Pro Chrome, Gigant Pro, Gigant Pro Flat, Gigant Pro Chrome or a shower channel or drain

Frame finish

We recommend: Install the product directly onto the floor with a built-in mini shower channel or drain.

Frame finish

T/AT profile (White / satin)

A connecting profile intended for attaching several shower enclosures or doors in a row divided by fixed walls together. Suitable for use in public shower areas.

The SDZ2, SDZ3 and SDOP shower doors can be combined with the PSS fixed walls only. The ASDP3 shower doors are compatible with the APSS fixed walls only.

Seats and hydro massage panels

Relaxation available any time

*Showering does not need to be mere quick wash in everyday routine.
Enjoy showering as you like it. Sit down and relax.*

Chrome

Chrome with white frame (folded up)

Chrome with stainless steel frame (folded up)

New design in proven quality

Favourite group the RAVAK seats is newly widened by the design close to the Chrome concept

- they will fit perfectly into the bathroom in the Chrome concept, but will look nice elsewhere
- they adhere to the high quality of shower seats
- two frame colour options available

The seats are suitable for shower areas larger than 90 x 90 cm at 45 cm over the floor.

Hydro Massage Panels

Jet Inox

Impressive stainless steel for a luxurious look and uncompromising quality. Three zones of circumferentially spaced jets, shower head and waterfall feature at the top of the panel to ensure an unforgettable experience.

Jet Glass

The glass design looks fragile and subtle in stark contrast to the strength of experience during showering. Eight swivel massage jets for the whole body and a shower head.

Jet

Jet Panel has a proven design and it features a large-scale fixed shower and a two-position massage jet with adjustable flow direction and a hand shower with 3 modes.

Fixed shower head and waterfall

Large shower head

Protected against clogging with limescale

LA type - fibreglass
EX, PU type - polyurethane foam with glass fibre

Shower Tray Installation

The construction of shower trays is divided into several types. Each type is installed in a different manner.

1) LA, LA+Base, LA+Base+Set types and cast shower trays should be installed on a base or directly onto the floor

LA type

Galaxy

- to be embedded into the floor
- designed for underpinning
- on a base

LA type shower trays consist of a laminate layer, reinforcement and an acrylic shell. Front covering panel is not included

LA, LA + Base, LA + Base + Set types

Sabina mini-bath

- LA type - designed for underpinning and encasing
- LA + Base type – to be installed on a base
- LA + Base + Set type – for installation on a base with a panel

Sabina deep seating shower trays consist of a laminate layer, reinforcement and an acrylic shell. Supportive legs and the front covering panel need to be purchased separately.

Cast shower trays

Galaxy Pro (Flat, Chrome)

- To be glued directly onto the floor
- installation on a base
- installation on a base with a panel

The Galaxy Pro, Galaxy Pro Flat and Galaxy Pro Chrome trays are cast shower trays made of ground dolomite and polyester resin, formed by "pure casting" technology. Neither the front covering panel (Set) nor the supportive legs (Base) are included with the tray; they need to be purchased separately.

Installation of shower tray on the floor, base and installation of self-supporting trays can be found at www.ravak.com:

2) PU, PP, PAN and EX type shower trays are self-supporting.

PU type

Kaskada

- self-supporting
- with an integrated front covering panel

A PU type shower tray consists of an acrylic shell and a polyurethane foam support reinforced with a glass-fibre mat. The PU tray is self-supporting and moulded together with the front panel. Installation of a PU shower tray often takes just a couple of minutes and this type belongs to the best value and least challenging trays.

PP type

Galaxy

- self-supporting
- necessary to purchase a suitable panel type

PP type shower trays use a separable-front-panel system. There are "N" panel types (for trays installed into a niche), and "L" panel types for trays installed in a common way into a bathroom corner. Because of large variability, the front panels are sold individually, i.e. they are not included in the price of the shower tray. There are construction differences between the supports of the EX and PP shower trays. Panels designed for PP trays are not compatible with the EX shower tray models.

PAN type

Galaxy

- self-supporting
- with the front covering panel included

PAN type shower trays consist of two separable parts: the tray itself and a front panel to be mounted on the polyurethane support. With this type, the front panel is included in the delivery package with the tray, as well as in the price.

EX type

Galaxy

- self-supporting
- intended for tiling

EX type shower trays consist of a polyurethane foam support and an acrylic shell. They differ from the PU type in the acrylic shell design. The EX type shell is trimmed to enable tiling of the tray with common tiling materials. The tiles can be fitted straight onto the body of the tray support.

What makes the PU, EX, PP and PAN self-supporting shower trays unique?

High rigidity - guarantee of durability

The exclusive rigid polyurethane support provides 100% stability of the shower tray.

Shape stability - the tray does not sag or squeak

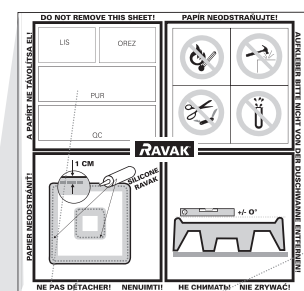

Following the top technology of high-pressure casting with the use of fibreglass, we obtained a material which will retain its shape throughout its lifelong use. Even with frequent use the tray will stay rigid and will serve you for a long time without problems.

Quick and easy installation

All you need for perfect installation and facing of the tray is one tube of RAVAK Professional sanitary silicon. No "wet" building process by which the tray gets so easily scratched.

Perfect draining

All new shower trays feature 90 mm diameter waste traps with 30 litres per minute flow volume, which fulfils even the highest requirements.

Each tray comes out individually labelled for easy and clear identification.

Shower Trays

Galaxy Pro Chrome

Low and smooth shower trays of cast marble

Easy maintenance thanks to the smooth bottom of the shower tray.

Linked to the concept

The shower tray bottom reflects the characteristic feature of the Chrome range - an oval shape in a form of rounded corners.

Extra flat design

Low and flat bottom makes the maintenance of the shower tray much easier.

Easy-access solution

Due to their thickness of 30 mm, these shower trays are ideal for walk-in access achieved by embedding them into the floor.

Embedded into the floor

Glued directly onto the floor

Deep seating tray **MINI-BATH**

When a classic bath doesn't fit

Shower tray protection against
bacteria and yeasts.

Is a bath too big for your bathroom?

Do your kids love having baths more than anything? Sabina deep seating mini-bath is designed for small bathrooms, where it will provide a possibility of having a bath or comfortable sitting while showering.

With its depth of 27 cm, it combines the benefits of a bath and a shower enclosure.

Antibac

Special protection method against growth and multiplication of bacteria and yeasts.

Panelkit Sabina 80, 90	✓

It is necessary to use the panelkit to mount the panel.

Suitable for:

lowered shower enclosures SKCP4 Sabina 80, 90 and BLCP4 Sabina 80, 90

The Sabina mini-bath is made using traditional technology, i.e. by reinforcing the acrylic shell with an epoxy resin and glass fibres.

The Sabina bath can be underpinned and encased, or you can stand it on the ground on its legs and attach a front covering panel. In any case, we recommend using the original support (legs), which can even support the seating part of the bath.

You can find the waste trap for the Sabina bath on page 125.

Shower Trays Galaxy

Extra Flat and Simply Beautiful

Shower tray protection against bacteria and yeasts.

Flat modern design

Extra flat acrylic shower tray with a depth of only 5 cm will enhance the appearance of any shower enclosure.

Antibac

Special protection method against growth and multiplication of bacteria and yeasts.

Accessories for Shower Trays

Waste Traps

High flow

The waste trap diameter is 90 mm, ensuring an outflow of at least 30 litres of water per minute. Therefore, they are suitable for shower enclosures with a hydro massage panel.

Easy to clean

All shower tray traps can be cleaned from the above after removing the cap which makes them suitable for "fixed" installed shower trays.

Options

Differences between the traps consist in different kinds of material used for the trap cover and its shape.

Accessories for Shower Trays

Basic

A shower tray trap with a stainless steel cover.

Standard

A shower tray trap with a metal plated plastic cover.

Professional

A shower tray trap with a metal cover.

Sabina Waste Trap

Intended for the Sabina mini-baths that have 52 mm Ø waste trap and overflow openings. Water outflow is controlled using the ClickClack system (the trap is closed by pressing the cover and opened by another pressing).

Waste Trap Adaptor 40/50

Reduces dimension differences between the drain pipe and waste trap.

RAVAK Professional sanitary silicone - 310 ml

RAVAK has tested and tried many silicones developed by major traditional manufacturers. One of the main conditions was the quality and durability of the sealed connections, as well as the ability to fix various materials used for shower enclosures, shower trays and baths together. Tests proved that it is almost impossible to choose a silicone that can adhere to glass, as well as to acrylic (PMMA), extruded polystyrene, aluminium, enamel, and many kinds of facing materials and tiles.

Therefore, RAVAK decided to co-operate with other manufacturers on developing their own silicone formula to fulfil all the above requirements.

RAVAK Professional sanitary silicone comes in two colours - white and clear (transparent).

Using the RAVAK Professional silicone is essential for sealing your shower enclosure, bath or shower tray properly.

It takes almost the whole 310ml tube of silicone to fully fix and seal a shower tray.

Cover strips

Cover strips

Used to seal the gap between the wall and the shower tray. They optimally cover and seal the gap, so cleaning is much easier than in the case of an unevenly applied sealant which spoils the appearance of the whole work when dirt settles on it. Cover strips can be purchased in the lengths of 1100 and 2000 mm and types 6, 10 or 11 mm. They are suitable for all types of shower trays.

Cover strip 6

- seals gaps up to 6 mm
- it can be supplied with a set containing 2 cover strip end pieces (L,R) and 2 corner connectors

Cover strips	Price
Cover strip 6/1100 white	✓

Accessories for Shower Trays

Recommended way of sealing a shower tray

Badly covered gap between the tray and the wall which will boost the formation of mould and mildew is really unnecessary. If you insert a cover strip into the joint between the shower tray and the wall, your work will become really professional.

Cover strip

RAVAK sanitary silicone

Self-adhesive strip

Shower Tray

Universal Mounting Kit

The Universal Mounting Kit is used for perfect sealing of a shower tray when installed into an already finished shower enclosure. This way the shower tray can be perfectly connected to the bathroom walls – perfectly in both appearance and function.

Universal Mounting Kit includes:

RAVAK Professional sanitary silicone, white, 310 ml
Self-adhesive strip 2200 mm
2 cover strips 6/1200 mm
2 corner connecting pieces for cover strips

Universal Base

Universal Base is suitable for all LA type shower trays (except for Sabina) and helps you to install the tray in perfect level. A shower tray that has been set and levelled on this support can easily be underpinned and tiled.

The Universal Base consists of two metal bearers (600, 650 or 750 mm long – according to dimensions of the tray) and four adjustable legs.

Base Galaxy Pro

The Galaxy Pro, Galaxy Pro Flat and Galaxy Pro Chrome cast trays can be installed directly into the floor without the need for the supportive legs.

If you want to install the tray onto the base, we recommend you to use the Galaxy Pro Base set containing 5 legs. The floor should be tiled before the work.

Why do baths differ?

Because their quality differs.

Acrylic plate (PMMA) No compromise on the material, we use the finest Lucite acrylic.

Acrylic moulding
We use technology to spot heating to guarantee optimum wall thickness baths in each location.

Moulding reinforcement
Hardening of the moulding by resin with the addition of fibreglass or polyurethane foam PU.

Finished bath
A finished bath of the highest possible quality on the market.

Why is the material used so important?

According to the method of the manufacturing of acrylic sheets, today the most common material for the manufacture of baths, we can distinguish two basic types of acrylic – extruded and cast acrylic. Chemically, they are both the same materials (polymethyl methacrylate - PMMA), but the different production methods cause significant differences in the utility qualities of this material. Extruded acrylic is produced by stretching, so its properties are preserved only in one direction. Sometimes, even thinner layer of extruded acrylic together with the ABS plastic plate is used. Baths made from this material exhibit the worst quality properties and after built into the bathroom they may eventually crack. Cast acrylic is poured into prepared moulds so the plate retains its physical behaviour in all directions. Cast acrylic is therefore a much better quality acrylic and it can guarantee that the product maintains its desired shape in the long term and that it doesn't sag or crack. That's why cast acrylic is more expensive than extruded.

These are the main reasons why cast acrylic is a number one choice for RAVAK which enables us to provide a ten-year warranty on baths.

Fibreglass

The most commonly reinforcement is made of polyester resin filled with fibreglass.

When reinforcing with laminate, the acrylate moulding is sprayed with a mixture of resin and fibreglass. The ratio of these components and the amount of spray applicator is controlled by a computer for each individual bath. The product with the sprayed layer then hardens in the tempering tunnel where strict process technology rules apply as well. The advantage of the glass fibre reinforced laminate is that it makes a high strength and tough product which is available at an affordable price.

PU PLUS

PU Plus reinforcement is a unique technology of reinforcement made out of polyurethane foam which has been developed by RAVAK.

At a fully robotised facility, the acrylic moulding is sprayed with polyurethane foam in three layers: (hard-soft-hard, or solid-foam-solid). Thanks to the precise manufacturing process, the PU Plus product has unique rigidity, excellent heat and acoustic insulating properties. The baths are therefore extremely sturdy. They are also ideal for the installation of hydro massage systems. Recycling of the product is yet another advantage.

Why to choose a PU Plus reinforced bath?

A solid bath that won't budge

PU Plus baths are almost as rigid as enamelled steel.

Thermo insulating properties

PU Plus baths keep water warm much longer.

Fully automatic manufacture

High technologies from Kawasaki and Bayer unfailingly eliminate any imperfections caused by human error.

Ideal for hydro massage baths

PU Plus hydro massage baths offer much quieter operation. The water cools down more slowly, thus enhancing the comfort of a hydro massage bath.

Baths reinforced by the PU Plus technology:

Chrome Bath

Synergy of Design and Function

Chrome Bath

An oval-shaped bottom

The characteristic oval shape, comfortable sloping back and vertical sides predestine this bath for versatile use, for both bathing and showering.

Perfectly co-ordinated design unit - Chrome concept

You can match your bathroom into a single unit without having to laboriously collect each product separately. The bath can be completed with a shower enclosure, washbasin with furniture, water taps and shower tray or channel, toilet with bidet and bathroom accessories.

Side panel U 70	✓

Note: The Classic bath can be complemented by the VS2, VS3, VS5, PVS1, BVS1, BVS2, CVS2 bath screens or the AVDP3 bath doors (see p. 192).

*) The handle cannot be combined with a bath screen. Headrest cannot be used for the 120 cm long bath. The products are as standard delivered within 14 days.

A mini-bath with a length of 120 cm can substitute a shower enclosure. Thanks to a standard depth of 42 cm, which is typical for all baths, it allows pleasant bathing e.g. for children, but when adding a bath screen it creates a perfectly sealed and large shower enclosure. Ideal solution for small bathrooms and niches.

Bath

Vanda II

A popular bath with agile lines

Vanda II Bath

Bath accessories

Bath Drain Sets

Bath drain sets are suitable for all types of baths. They are made of top quality materials and differ by their technical and design solutions. We offer two basic types – **classic bath waste sets with an overflow** and **bath waste sets with an overflow filling**.

With regard to draining control, we manufacture **the ClickClack mechanism** (i.e. the outflow is closed by pressing the drain plug and opens by another pressing), or a system called **bowden cable system** (i.e. the trap cap is controlled by turning the top control to the open/closed position).

Bath waste sets with an overflow filling system

Bath waste set with an overflow filling system, the outflow is controlled by the **Bowden cable** mechanism

Bath waste set with an overflow filling system, the outflow is controlled by the **ClickClack** mechanism

The bath waste set with overflow controlled by the **Bowden cable**. Length 800 mm

Cover strips

Cover strips

Used to seal the gap between the wall and the shower tray. They optimally cover and seal the gap so that cleaning is much easier than in the case of an unevenly applied sealant which spoils the appearance of the whole work when dirt settles on it. Cover strips can be purchased in the lengths of 1100 and 2000 mm and types 6, 10 or 11 mm. They are suitable for all types of shower trays and baths.

Cover strip 6

- seals gaps up to 6 mm
- it can be supplied with a set containing 2 cover strip end pieces (L,R) and 2 corner connectors

Cover strips	Price

RAVAK Professional sanitary silicone - 310 ml

RAVAK has tested and tried many silicones developed by major traditional manufacturers. One of the main requirements was the quality and durability of the sealed connections, as well as the ability to fix various materials used for shower enclosures, shower trays and baths together. Tests proved that it is almost impossible to choose a silicone that can adhere to glass, as well as to acrylic (PMMA), extruded polystyrene, aluminium, enamel, and many kinds of facing materials and tiles.

Therefore, RAVAK decided to co-operate with other manufacturers on developing their own silicone formula to fulfil all the above requirements.

RAVAK Professional sanitary silicone comes in two colours - white and clear (transparent).

Most of the baths are available with compatible handles and headrests made of coated dense polyurethane. Usual colours: white and grey.

Bath Screens and Doors

They can be mounted into a finished bathroom, both on the common shape and asymmetrically shaped baths.

Designed to keep the bathroom dry, prevent splashing water and allow comfortable showering while standing.

Universal Bath Screens

BVS1 one-piece fixed bath screen

It consists of rounded fixtures (B-SET) and a fixed transparent glass panel with a thickness of 8 mm.

CHROME

Product (type)	Width (mm)	Price	Price (komplet)
BVS1 80	800	✓	✓
B SET	-	✓	

Height of the product is BVS1 - 1500 mm.
The products are as standard delivered within 14 days.

BVS2 two-piece movable bath screen

The screen consists of one fixed and one moveable part, which can be swung out of the bath. The thickness of the toughened glass is 8 mm on the fixed part and 6 mm on the moveable part.

CHROME

Product (type)	Width (mm)	Price	Price (komplet)
BVS2 100 L/R	1000	✓	✓
B SET	-	✓	

BVS2 product height - 1500 mm. L - left hand product option. R - right hand product option.
Products are as standard delivered in 14 days.

CVS2 two-piece movable bath screen

The screen consists of one fixed and one moveable part, which can be turned out of the bath. The moveable part can thus be opened up at a maximum angle almost all the way to the washbasin. Thanks to the sophisticated opening method that respects the depth of the washbasin, it is much easier to clean the screen. The bath screen features a holder for better fixation.

Wellness

Relax at home

*The bath can become the highlight of the day.
Do not hurry, let the modern technologies spoil you for perfect body relaxation.*

RAVAK Hydro Massage Systems

- ▶ The RAVAK brand has been known for quality and production tradition since the previous century.
- ▶ We manufacture baths in the Czech Republic and each product is subjected to strict final inspection.
- ▶ The PU Plus reinforced baths are ideal for installation of the hydro massage systems.
- ▶ We use components manufactured solely by reputable companies in EU countries.
- ▶ All services and installations of the hydro massage systems are provided by our own service network.

RAVAK hydro massage systems offer **4 basic massage types**:

Intense water massage

Gentle air massage

Combined water and air massage

Exceptional water and air massage, unique by quiet and inexpensive operation

To select a massage bath with the required options and accessories, use our unique **Hydro Massage System Selection Wizard** at www.ravak.com

In seven easy steps, choose all the parameters, from the type of the bath to the accessories, while checking the total cost so that the resulting product suits all your requirements.

Tips for Selecting a Hydro Massage System

Sport Hydro/Air - a very popular system

4x Super Jet

Enables adjustment of the stream of water in a 30 degree angle and regulation of its flow. When fully closed, the full massage intensity is focused on the micro-jets in the back and feet areas.

2x Air intake regulator

The air intake is divided into two circuits. Together with closable jets, you can therefore focus the massage intensity into one or the other half of the bath.

2x Pneumatic control ON/OFF

Independent controls for hydro massage and air massage.

6x Micro Jet

The thin stream of water can be adjusted in a 30 degree angle.

16x Air Jet

An increased number of metal jets is located in a pattern on the bottom in order to maximise their massage effect.

1x Suction

The cap of the safety suction.

The massage systems of the Sport range feature closable jets with air intake regulators which enable concentrating the water massage intensity into one or the other half of the bath. The Hydro/Air model is one of the most powerful systems.

Extra Flat Whisper - state-of-the-art system

4x jet Midi Extra Flat

The water flow from the metal jet can be adjusted in a 30 degree angle.

2x Suction

If one of the safety suction tube filters gets clogged, the other one secures sufficient water flow to the pump.

6x Micro Extra Flat Jet

Metal micro-jets provide focused massage of the feet and lower back. The thin stream of water can be adjusted in a 30 degree angle.

12x jet Magic Extra Flat

Metal jets have an independent air intake and using the Venturi effect they mix water and air to create a powerful massage field.

1x Pneumatic control ON/OFF

1x Control valve

The two-way valve allows fast and smooth switching between the side and bottom jets. In the central position all jets are turned on.

1x Independent air intake regulator

The regulator adds air to the water increase the massage effect.

The Extra Flat systems boast extra flat, all-metal jets and the control valve which allows fast and smooth switching between the individual massage jets. When combined with the Whisper system they provide the state-of-the-art type of massage ensuring perfect relaxation.

For more information, see the **Catalogue of Hydro Massage Systems** or visit www.ravak.com

Custom built hydro massage system for the **LoveStory II** bath

An intensive feeling of relaxation when bathing with a partner

The LoveStory II bath can be fitted with either Atomic or Atomic Plus hydro massage system that can fully substitute a traditional air bubble massage or hydro massage bath.

Both the Atomic and Atomic Plus Systems include:

- 16x Special hydro massage jet
- 1x Chromotherapy feature
- 1x Electronic control unit

Additionally, the Atomic Plus system features:

- 1 x automatic disinfection unit
- 1 x water heating

Chromotherapy

Chromotherapy (healing with colour and light) is a standard feature of both the Atomic and Atomic Plus systems.

It uses 4 basic colours - red, yellow, green and blue to beneficially influence the organism. The colours slowly blend to enhance the colour spectrum, which amplifies the bath delight and helps your mind relax.

Note: Colour version available for the hydro massage systems: chrome.

The price of the hydro massage system includes a special waste set or a waste set with overflow filling for draining the hydro massage system.

L - left hand product option. R - right hand product option.

PU Plus bath.

Products are as standard delivered in 21 days.

We provide a 5-year warranty on baths fitted with the hydro massage system.

The warranty covers the bath and seal quality of the hydro massage system. The warranty for the hydro massage system is 24 months from the date of installation.

Hydro massage system tailored to the bath **You**

Now, you will not want to spend your leisure time anywhere else.

The You bath can be fitted either with the You Plus Hydro/Air or You Duo Hydro/Air hydro massage system which is designed to suit all figures, tall or short.

- 10 x hydro massage Hydro Jet
- 8 x air massage Air Jet
- 1 x underwater LED light
- 2 x suction inlet
- 1 x special drain set with overflow filling
- 1 x water heating
- 1 x electronic control unit

Underwater LED Light

For the included underwater LED light, you can choose from several colours: white, yellow, red, green or blue. Please specify in the order which is your favourite.

Or, for an extra charge replace the LED light with the chromotherapy system with the STOP feature and you don't have to worry about choosing the colour. More at www.ravak.com

Note: The total cost of the hydro massage system includes a special waste set for draining the system. Due to the specific construction of the You hydro massage system, the waste set is included with the system, therefore you are not able to install a waste system of your own choice.

400 x 220 x 500 mm - L/R
 Cabinet with a shelf.

The door needs to be ordered separately in either left or right hand option!

The cabinet is designed under the Classic small washbasin

right hand option

SD Classic

600 / 700 / 800 x 490 x 470 mm (SD Classic 800 - L/R)
 Cabinet with a high drawer offering ample storage space in a height of 40 cm.

The cabinet is designed under the Classic washbasin 600 / 700 / 800.

SD Classic

1300 x 490 x 470 mm
 Cabinet equipped with two high drawers (40 cm). The right hand part under the washbasin features an integrated drawer for small items. Optionally, it is available for the other part as well.

The cabinet is designed for the Classic double washbasin 1300.

SB Classic

350 x 370 x 1200 mm - L/R
 High column cabinet with two glass shelves and a handy drawer at the top.

Special impregnation and surface treatment to provide water resistance.

Praktik washbasin and mirror

Well thought-out shelf space
Rounded corner leaves more room for you to walk through
The washbasin together with the cabinet create a sophisticated whole

left hand option

Praktik U Washbasin

780 x 490 mm - L/R
 Designed into the corner or right next to the bath.

Can be combined with the M 780 mirror.

left hand option

Praktik S Washbasin

960 x 490 mm - L/R
 It features shelf space on both sides. The "wet" shelf is placed lower than the "dry" one, and serves to keep things that drip water e.g. a toothbrush. The "dry" shelf is placed higher and serves to keep dry such things as a shaver.

Can be combined with the SDZU Praktik S cabinet.

left hand option

Praktik W Washbasin

1160 x 650 mm - L/R
 Designed to be placed over the washing machine; the large shelf area is not connected with the machine so the spinning does not cause any vibration.

Washbasin accessories

Washbasin wastes and traps

We offer washbasin waste plugs for all applications. The low waste plug is suitable for use with furniture where it saves space and it is recommended to be combined with the waste trap U pipe.

The classic waste plug looks smart if the washbasin is placed without furniture and can be combined with the brass waste trap. The fixed waste plug has to be used for small washbasins without an overflow, it prevents from spilling of the basin.

Sink Accessories

Washbasin fixed waste plug designed for small washbasins without an overflow

Washbasin ClickClack waste plug for all types of washbasins

Washbasin low ClickClack waste plug for all types of washbasins

Suitable for the washbasin with furniture where it saves space.

Washbasin waste trap U pipe for all types of washbasins

Suitable for the washbasins with furniture.

Washbasin brass waste trap for all types of washbasins

Product dimensions are given as width x depth x height.
 Products are as standard delivered within 14 days.

Expansion of the existing Chrome Concept to achieve absolute perfectness

Chrome Control push buttons

247 x 165 mm
Harmonious shape of oval characterises the Chrome design of steel buttons. The mechanism is integrated in the wall so the buttons only slightly protrude.
Available in two designs:
Satin and White

Universal control push buttons

247 x 165 mm
Plastic buttons with surface treatment to make them scratch resistant.
Available in two designs:
Satin and White

Wall mounted installation module W

1062 x 592 x 145 - 220 mm
Basic module for hanging toilet designed to be set in the wall and tiled. The product includes an insulation sheet for WC. Economical, adjustable flushing between 2-3.5l / 6-9l.

Wall mounted installation module G

1076 x 510 x 180 - 295 mm
Framed module designed for hung toilets to be built in dry wall. The product includes an insulation sheet for WC. Economical, adjustable flushing between 2-3.5l / 6-9l.

Adding a bracket to the module creates an option suitable for mounting the toilet during refurbishment of sanitary units, for timbered houses, etc. Module installed in this way is self-supporting.

Chrome toilet seat

365 x 430 x 40 mm
A seat of rigid plastic, equipped with the Soft Close slow-down mechanism.

Water taps

Elegant, reliable and reasonably priced

Quality water taps create the basis of any bathroom. Choose the best materials, timeless design, solid manufacture and long life guarantee.

New

Water taps 10°

Coming towards you

10°

Water taps 10° are part of the 10° Concept.
See pages 26 - 27.

Modern design and not only that! The tap is 10° inclined towards your hand which makes its control easy and it is in harmony with every basin shape.

design nosal®

The 10° water taps were designed by the Czech designer Kryštof Nosál.

Adjustable aerator - makes adjustment of the water stream much easier.

Ceramic cartridge with 35 mm diameter is tested for a minimum life of 30 years.

The 10° water taps Ceramic cartridge with 35 mm diameter is 5 year warranty.

Water taps 10°

The 10° water tap can be of standard or extended height.

Choose the ideal size. Higher taps will create more comfortable space for washing. The flexible aerator will ensure that the flow of water will always go directly to the drain to prevent splashing of water.

Washbasin standing water tap

Washbasin standing water tap
140 mm, with the waste
TD 011.00

Washbasin standing water tap
170 mm, with the waste
TD 013.00

Practical tilt of the water tap toward the hand and into the washbasin will make the usage more pleasant. Furthermore it is very easy to clean the space between the water tap and the wall.

Note: Products 10° will be available from 03/2015.

Concept 10°

You will enjoy the dynamic interaction with the bath of the 10° concept. The sophisticated asymmetry adds the 10° bath water tap original style allowing easy control.

Thermo

Constant Water Temperature

The thermostatic tap will balance the changes of water pressure and temperature in the pipes, ensuring the water will maintain the temperature you have set. Once you have tried the thermostatic water tap, you will stand by it forever .

Easy way of scale removal.

For cleaning of water taps, use RAVAK Cleaner Chrome or other non-aggressive detergents in order to prevent damage to the chromium surface layer.

All thermostatic taps feature a ceramic cartridge for water flow control and a thermostatic cartridge for water temperature control. The water tap and both cartridges have 5 years warranty.

Integrated diverter

The bath/shower diverter integrated in the head for simple control.

Clear marking

Prevents mistaking hot for cold water.

Safety lock

Against unwanted change in water temperature above 38°C.

FastReaction

Reacts immediately to water pressure changes and keeps the mixed water at constant temperature.

Scald protection

Should there be a fault in the cold water inlet, it immediately decreases flow in the hot water inlet.

Saving

Reduces consumption of water and energy used for its warming.

Neo

Majestic and Elegant

Neo water taps feature robust elegance. You won't overlook a Neo tap in your bathroom - it is attractive and will elegantly complement all other bathroom accessories.

Easy way of scale removal.

Ceramic cartridge with 40 mm diameter is tested tested for a minimum life of 30 years.

Neo water taps are covered by a 5 year warranty.

Built-in taps will enhance the sleek and stylish look of your bathroom.

The built-in tap with diverter directs the flow of water to two different places - either to the bath and shower, or to the hand and head shower.

Ergonomic diverter

Practical shape of the diverter allows its operation with wet hand.

Locking of the switch - bath / shower

The switch does not go off with a pressure drop.

Rosa

Natural Beauty

Rosa water taps are part of the Rosa Concept. See pages 34 - 35.

The true beauty comes from nature. Neat and smooth lines, round edges and harmonious proportions. The Rosa taps are designed to elegantly complement your bathroom with their beautiful and pleasing shape.

Easy way of scale removal.

Ceramic cartridge with 40 mm diameter is tested tested for a minimum life of 30 years.

Rosa water taps are covered by a 5 year warranty.

We recommend using a filtration system at the inlet pipe to the apartment/house. It will prolong not only the working life of the water tap, but also a washing machine or a dishwasher.

Can be controlled with one finger
A useful projection on the bottom of the lever for ease of control.

Showers

Long-term Pleasure and Delight

The beautiful design which adds an aesthetic value to your shower as well as ensuring durability of the whole mechanism, long life, lower water consumption, easy cleaning and maintenance.

SoftRain is a technology which allows air to be sucked automatically into the shower head, thus saving water consumption. Moreover, the stream of water enhanced with air bubbles makes the showering experience even more relaxing.

For cleaning of water taps, use RAVAK Cleaner Chrome or other non-aggressive detergents in order to prevent damage to the chromium surface layer.

Function for simple cleaning of small shower nozzles. Limescale formed on the jets can be simply wiped off with a gentle touch of your hand.

R-box

Basic unit for built-in taps

Basic unit for built-in taps

R-box
RB 070.50

R-box is a perfect, universal built-in system for lever, bath and shower built-in water taps. The tap's main body is made of high-quality brass. Unlike traditional built-in taps, the R-box installation is much easier and the potential exchange of the top part is simple. The top part of the R-box (Rosa, Neo, Chrome, a 10° taps numbered 065 and 066) is mounted after the bathroom has been completely finished, ensuring that the tap won't get scratched or damaged during final construction work.

Suitable for bath and shower built-in water taps (cannot be used for thermostatic water taps).

Developed for easy and quick installation

Compatible with all common piping systems (PPR, copper, plastic)

top part
RS 066.00

The R-box enables very easy and quick installation. It offers various ways of mounting - into a plaster board or classic brick partition (dry and wet walling). It can be placed into a depth of 70 - 100 mm. The R-box contains wall fixings, it does not include connections for water pipes or any other plumbing materials.

Note: New products will be available from 03/2015.

RAVAK AntiCalc® Technology

The best service comes directly from the manufacturer.

An invisible shield against grime and water deposits on glass

Each type of water (except for rain- and distilled water) always contains a certain amount of dissolved mineral salts. When these salts (the so-called limescale) deposit on glass, it can be very difficult to remove them. They create a chemical bond with the glass surface, giving the glass an unsightly tint. Common cleaning products are quite ineffective against limescale.

Only the **patented RAVAK AntiCalc® surface treatment technology** can reliably protect glass from stable sediments. All RAVAK shower enclosure and screen glass panels are treated with RAVAK AntiCalc® during manufacture.

Glass sample treated with RAVAK AntiCalc® - water is repelled and runs down the glass.

Water effect on glass which was not treated with RAVAK AntiCalc®.

How to use RAVAK AntiCalc® Conditioner

First, clean the whole glass panel with a detergent (RAVAK Cleaner). Then apply the RAVAK Conditioner using a dry cloth on the inner side of the glass panel, which must be absolutely clean and dry. Spread the Conditioner evenly and polish the glass dry afterwards.

The water-repelling layer on the glass surface is renewed and for another 3 months (depending on the hardness of water) just clean the glass panels with a common detergent.

RAVAK Cleaning Detergents

RAVAK Cleaner Effectively cleans the whole bathroom

- Perfectly removes grease and remaining water deposits.
- Recommended for acrylic baths, shower trays, shower enclosure panels, but also for water taps, bathroom furniture and ceramic tiles.

RAVAK Cleaner Chrome For water taps

- Special detergent intended for removing grease and scale deposits from chromium-plated surfaces of water taps, accessories for water taps and chromium-plated surfaces of shower enclosures.

RAVAK AntiCalc® Conditioner Household helper in the fight against limescale

- You can renew the water-repellent qualities of our technology in your home conditions as well.
- We guarantee 10 years of perfect functioning of RAVAK AntiCalc® system if it is regularly renewed and correctly maintained with the AntiCalc® Conditioner.

RAVAK Desinfectant Helps get rid of bathroom mould

- A highly effective product of strong antiseptic character.
- Intended for the disinfection of all spots in the bathroom, where the mould and mildew thrive, mainly for surfaces of baths, shower trays, shower enclosures and hydro massage systems.

Use the biocidal RAVAK Desinfectant safely.
Read the instructions on the package and leaflet carefully before use.

RAVAK Turbo Cleaner Effectively cleans waste pipes

- Multi-effective detergent to dissolve even the heaviest grime sediments in waste pipes of baths, shower trays, and washbasins.
- Do not use for cleaning of products, especially of their metal parts.

RAVAK Teflon sanitary grease Invisibly lubricates

- Intended mainly for sliders and hinges of shower enclosures, doors and screens, cartridges, movable parts of water taps, door locks and handles.
- Water-resistant and highly effective - one droplet is enough.
